SOFIANE YAGOUB

Frontend Developer · React · Vue · Next.js · React Native

Ain Temouchent, Algeria · +213 697 75 54 56 · sofienygb10@gmail.com · sofianeyagoub.com

PROFILE

Frontend developer with over 4 years of experience building production web and mobile applications for enterprise and public-sector clients, including LG Electronics, Air Algérie, the UNDP and the Algerian Ministry of Health. I specialise in React, Vue and Next.js interfaces, Inertia.js applications and cross-platform React Native products shipped to both the App Store and Google Play. I own features end to end, with a strong focus on responsive and performant UI, clean component architecture and reliable REST API integration, and I work daily with AI-assisted development tools to move faster without trading away code quality.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, PHP
Frontend	React.js, Vue.js 3, Next.js, Astro, Inertia.js, Redux / Redux Toolkit, Tailwind CSS, SASS, Bootstrap
Mobile	React Native — cross-platform development, native builds, code signing and store deployment (App Store Connect, Google Play Console), OTA updates and versioned releases
Backend & Data	Laravel, REST API design and integration, MySQL
Engineering	Responsive & mobile-first design, SEO and Core Web Vitals, internationalisation and RTL layouts (Arabic / French), reusable component libraries, Git & code review, Agile / Scrum (ClickUp, Jira)
AI Tooling	Daily use of AI coding assistants (Claude / Claude Code, GitHub Copilot, ChatGPT) for scaffolding, refactoring, code review, test generation and documentation — integrated into a normal review-and-test workflow rather than used blindly

PROFESSIONAL EXPERIENCE

Frontend Developer — KYO Conseil

Algiers, Algeria | January 2022 – Present

- Own frontend delivery end to end — from client requirement and technical specification through development, testing and production release — on web and cross-platform mobile products used daily by thousands of end users.
- Build scalable interfaces with React.js, Next.js and Vue.js, structured around reusable component libraries and predictable state management (Redux Toolkit), so codebases stay maintainable as features and team size grow.
- Develop and ship cross-platform mobile applications in React Native, handling the complete release cycle on **iOS and Android**: build configuration, provisioning and code signing, store submission, review feedback and versioned updates.
- Integrate REST APIs in close collaboration with backend developers, agreeing on contracts early so frontend and backend work can progress in parallel and integration surprises are avoided.
- Deliver responsive, mobile-first interfaces with strong attention to UI/UX detail, cross-browser consistency, accessibility and page performance (Core Web Vitals, SEO-friendly markup), including multilingual and right-to-left (Arabic / French) layouts built on translation-key architectures.
- Work in Agile teams of up to six developers — sprint planning and estimation, daily follow-up on ClickUp / Jira, stakeholder demos — while reviewing teammates' code and mentoring juniors on component design and frontend best practices.
- Analyse client needs, lead collaborative working sessions, document requirements and turn them into actionable technical tasks — then stay available for support once the product is live.
- Maintain and evolve products in production: bug fixing, refactoring of legacy code, performance improvements and continuous delivery of new features.
- Use AI coding assistants daily for scaffolding, refactoring, code review, test generation and documentation, inside a review-and-test workflow that shortens delivery time without lowering code quality.
- Deliver across a wide range of sectors — consumer electronics, aviation, healthcare, insurance, e-commerce and public-sector / NGO programmes — adapting quickly to each domain and its constraints.

Stack: React.js · Next.js · Vue.js · Inertia.js · Redux Toolkit · React Native · Astro · TypeScript · JavaScript · Tailwind CSS · SASS · HTML5 / CSS3 · Laravel · REST APIs · MySQL · Git

EDUCATION

2020	Master's Degree in Aeronautics — Saad Dahleb University, Blida
2018	Bachelor's Degree in Aeronautics — Saad Dahleb University, Blida
2015	Technical Mathematics Baccalaureate — El-Fadile El-Ouartlani High School, Ain Temouchent

LANGUAGES & STRENGTHS

Arabic — Native
English — Advanced
French — Conversational

Team collaboration & mentoring · Ownership from spec to release · Attention to detail · Clear communication with non-technical stakeholders · Perseverance
